

30 Month Questionnaire

28 months 16 days through 31 months 15 days

On the following pages are questions about activities children may do. Your child may have already done some of the activities described here, and there may be some your child has not begun doing yet. For each item, please fill in the circle that indicates whether your child is doing the activity regularly, sometimes, or not yet.

	Important Points to Remember: Not	es:			
	☑ Try each activity with your child before marking a response.				
	Make completing this questionnaire a game that is fun for you and your child.				
	☑ Make sure your child is rested and fed. ——				
	Please return this questionnaire by				
C	OMMUNICATION	YES	SOMETIMES	NOT YET	
1.	If you point to a picture of a ball (kitty, cup, hat, etc.) and ask your child "What is this?" does your child correctly <i>name</i> at least one picture?	d,	\circ	\bigcirc	
2.	Without your giving him clues by pointing or using gestures, can your child carry out at least <i>three</i> of these kinds of directions?	\bigcirc	\bigcirc	\bigcirc	
	a. "Put the toy on the table." d. "Find your coat."				
	b. "Close the door." e. "Take my hand."				
	c. "Bring me a towel."				
3.	When you ask your child to point to her nose, eyes, hair, feet, ears, and so forth, does she correctly point to at least seven body parts? (She capoint to parts of herself, you, or a doll. Mark "sometimes" if she correctly points to at least three different body parts.)				
4.	Does your child make sentences that are three or four words long? Please give an example:	\bigcirc	\bigcirc	\bigcirc	
5.	Without giving your child help by pointing or using gestures, ask him t "put the book on the table" and "put the shoe under the chair." Does your child carry out both of these directions correctly?		\bigcirc	\bigcirc	
5.	When looking at a picture book, does your child tell you what is happening or what action is taking place in the picture (for example, "barking," "running," "eating," or "crying")? You may ask, "What is the dog (or boy) doing?"	<- 3

G	ROSS MOTOR	YES	SOMETIMES	NOT YET	
1.	Does your child run fairly well, stopping herself without bumping into things or falling?	0		0	
2.	Does your child walk either up or down at least two steps by himself? He may hold onto the railing or wall. (You can look for this at a store, on a playground, or at home.)			0	_
3.	Without holding onto anything for support, does your child kick a ball by swinging his leg forward?			0	_
4.	Does your child jump with both feet leaving the floor at the same time?			0	
5.	Does your child walk up stairs, using only one foot on each stair? (The left foot is on one step, and the right foot is on the next.) She may hold onto the railing or wall.	0		0	*
6.	Does your child stand on one foot for about 1 second without holding onto anything?		GROSS MOT	O	
			*If Gross Motor Item "yes" or "some	m 5 is marked	

FI	NE MOTOR	YES	SOMETIMES	NOT YET	
1.	Does your child use a turning motion with her hand while trying to turn doorknobs, wind up toys, twist tops, or screw lids on and off jars?	\bigcirc	\bigcirc	\bigcirc	
2.	After your child watches you draw a line from the top of the paper to the bottom with a pencil, crayon, or pen, ask him to make a line like yours. Do not let your child trace your line. Does your child copy you by drawing a single line in a vertical direction?				
3.	Can your child string small items such as beads, macaroni, or pasta "wagon wheels" onto a string or shoelace?	0	0	0	
4.	After your child watches you draw a line from one side of the paper to the other side, ask her to make a line like yours. Do not let your child trace your line. Does your child copy you by drawing a single line in a horizontal direction?	0			
5.	After your child watches you draw a single circle, ask him to make a circle like yours. Do not let him trace your circle. Does your child copy you by drawing a circle?	0			_
6.	Does your child turn pages in a book, one page at a time?	\bigcirc	\circ	\circ	
			FINE MOTO	OR TOTAL	
P	ROBLEM SOLVING	YES	SOMETIMES	NOT YET	
1.	When looking in the mirror, ask, "Where is?" (Use your child's name.) Does your child point to her image in the mirror?	\bigcirc	\bigcirc	\circ	
2.	If your child wants something he cannot reach, does he find a chair or box to stand on to reach it (for example, to get a toy on a counter or to "help" you in the kitchen)?	\bigcirc	0	0	

Pl	ROBLEM SOLVING (continued)	YES	SOMETIMES	NOT YET	
3.	While your child watches, line up four objects like blocks or cars in a row. Does your child copy or imitate you and line up four objects in a row? (You can also use spools of thread, small boxes, or other toys.)		0	0	
4.	When you point to the figure and ask your child, "What is this?" does your child say a word that means a person or something similar? (Mark "yes" for responses like "snowman," "boy," "man," "girl," "Daddy," "spaceman," and "monkey.") Please write your child's response here:	0			
5.	When you say, "Say 'seven three,'" does your child repeat just the two numbers in the same order? Do not repeat the numbers. If necessary, try another pair of numbers and say, "Say 'eight two.'" Your child must repeat just one series of two numbers for you to answer "yes" to this question.			\bigcirc	
6.	After your child draws a "picture," even a simple scribble, does she tell you what she drew? (You may say, "Tell me about your picture," or ask, "What is this?" to prompt her.)	\bigcirc	\bigcirc	\bigcirc	_

. Do you have any concerns about your child's behavior? If yes, explain:	YES	O NO
Does anything about your child worry you? If yes, explain:	YES	O NO

Lead Exposure Risk Assessment Questionnaire for Children

In addition to the required testing of all children for lead with a blood lead test at one year of age and again at age two, assessment of risk for lead exposure should be done at each well-child visit or at least annually for each child six months to six years of age. The questions below serve as a risk assessment tool based on currently accepted public health guidelines. Children found to be at risk for lead exposure should receive a blood lead test whenever such risk is identified.

1. Does your child live in or regularly visit a house/building built before 1978 with peeling or chipping paint, or with recent or ongoing renovation or remodeling? Note: This could include a day care center, preschool, and the home of a babysitter or a relative. 2. Has your family/child ever lived outside the United States or recently arrived from a foreign country? 3. Does your child have a brother/sister, housemate/playmate being followed or treated for lead poisoning? 4. Does your child frequently put things in his/her mouth such as toys, jewelry, or keys? Does your child eat non-food items (pica)? Note: This may include toys or jewelry products that have been recalled by the Consumer Products Safety Commission (CPSC) due to unsafe lead levels: www.nyhealth.gov/environmental/lead/recalls 5. Does your child frequently come in contact with an adult whose job or hobby involves exposure to lead? Note: Jobs include house painting, plumbing, renovation, construction, auto repair, welding, electronics repair, jewelry or pottery making. Hobby examples are making stained glass or pottery, fishing, making or shooting firearms and collecting lead	Ans	nswer	
Questions	Yes	No	
or ongoing renovation or remodeling?			
2. Has your family/child ever lived outside the United States or recently arrived from a foreign country?			
3. Does your child have a brother/sister, housemate/playmate being followed or treated for lead poisoning?			
(pica)? Note: This may include toys or jewelry products that have been recalled by the Consumer Products Safety Commission			
Note: Jobs include house painting, plumbing, renovation, construction, auto repair, welding, electronics repair, jewelry or			
6. Does your child live near an active lead smelter, battery recycling plant, or another industry likely to release lead, or does your child live near a heavily-traveled road where soil and dust may be contaminated with lead? Note : May need to alert parent/caregiver if such an industry is local.			
7. Does your family use products from other countries such as health remedies, spices, or food, or store or serve food in leaded crystal, pottery or pewter?			
Note: Lead has been found in traditional medicines such as Ayurvedic medicine, liga, greta, azarcon, litargirio, and in cosmetics such as kohl, surma, and sindoor. Lead exposure risk is higher with old, imported, painted, cracked or chipped china, and in low-fired and terra cotta pottery, often made in Latin America and the Middle East.			

If the answer to any of the above questions is YES, then the child is considered to be at risk for lead exposure and should receive a blood lead test.

- Ask any additional questions that may be specific to a particular community (or population) e.g. high risk zip code, refugee child
 recently arrived in the United States, children with behavioral and/or developmental disabilities, children who receive Medicaid
 or children entering foster care.
- Ask if any of the above conditions are expected to change in the future (e.g. house remodeling).
- Tailor appropriate anticipatory guidance to the child and family.
